THE SYSTEM THAT EXPANDS WITH YOUR DATA

The XpresspaX™, Inc. interchangeable color-coded media tray insert system, is a unique storage method that allows you to use the same size containers for nearly any media available—including tapes, CD/DVD and hard drives.

The XpresspaX system provides a clear advantage over the limiting approaches of most competitors. Our “one size fits nearly everything” system offers you flexibility and ease of use for all your off-site or in house media transportation and storage needs.

Whether you need an off the shelf solution or have a custom data storage requirement, XpresspaX systems have you covered. It’s easy, it’s quick and it’s what we do every day.

Key advantages of the XpresspaX system:

- Secure, weather-resistant container design.
- Media specific trays ensure the ideal fit for any media.
- Common tray sizes interchangeably fit our single and dual tray containers.
- System is compliant with media manufacturers storage and transit requirements.
- Media-specific inserts are designed to maintain tape manufacturers’ recommended storage orientation. Containers can be stored in either of two orientations—horizontally (on their base) or vertically (on their spine)—which keeps media on its’ proper axis.
- Quick, convenient customer service ready to help find solutions to unique challenges and custom applications.

SINGLE TRAY CONTAINER SKU: XPX C1

We use high-impact absorbing customized resin that takes a beating. Drop it. Hit it. Kick it around. This container is certified to last.

DIMENSIONS

Ext: 14.75” x 11.5” ax 5.9” Int: 12.25” x 9.75 x 5.5”

Strong, positive double latching system with butterfly clasps and lockable hasps. Latches are riveted to the container and tested for durability. (Locks not included)

- 1) Ergonomic molded handle is metal riveted to container.
- 2) Oversized bumper protects container.
- 3) Sturdy, comfortable grips for carrying containers.

DUAL TRAY CONTAINER SKU: XPX C2

We use high-impact absorbing customized resin that takes a beating. Drop it. Hit it. Kick it around. This container is certified to last.

DIMENSIONS

Ext: 27” x 11.5” ax 5.9” Int: 25” x 9.75 x 5.5”

Strong, positive double latching system with butterfly clasps and lockable hasps. Latches are riveted to the container and tested for durability. (Locks not included)

- 1) Ergonomic molded handle is metal riveted to container.
- 2) Oversized bumper protects container.
- 3) Sturdy, comfortable grips for carrying containers.

SCALABLE, INTERCHANGEABLE, INDISPENSIBLE.

Designed and manufactured in the USA using custom-formulated high-strength resin, our containers withstand significant impact and protect your media through normal transit and storage situations. XpresspaX delivers the best quality and value you'll find anywhere.

And because we value the trust placed in us by our customers, XpresspaX offers a lifetime warranty against defects in material and workmanship in each of our products. Please see www.xpresspax.com for complete warranty and liability details.

CONTAINERS
& INSERTS

All XpresspaX containers and inserts are made in the USA and come with a lifetime warranty against manufacturer's defects in material or workmanship. Hundreds of thousands of XpresspaX containers are currently in service around the world.

XpresspaX offers a complete system of interchangeable insert trays and containers to suit any data storage need. All inserts are standard sized to fit in all single or double containers. Mini container inserts for tapes and drives are also available.

MINI CONTAINER SKU: XPX C3

Made from the same high-impact absorbing resin used in our larger containers, but purpose built for compact portability.

DIMENSIONS

Ext: 11.25" x 7.5" x 6" Int: 9" x 5.5" x 5.5"

Weight empty: 2.25 pounds

Strong, positive single-latching system with butterfly clasp and lockable hasp. (Locks not included.)

This container when used with the XPX I-60 insert (shown above) is Fuji certified for storage and transportation of LTO tapes without case! Particulate-free and impact protection.

WATER & DUST PROTECTED • SECURE • CERTIFIED!

CERTIFICATIONS

For over 15 years, XpresspaX has been introducing innovative protective features that are now considered the industry-standard for the world's largest data storage companies, data creators, and tape manufacturers. These include higher thresholds of protection from particulates, water, impact and overall security. Now XpresspaX has independent lab testing to prove superiority across the board! As the value and density of data stored on back-up tapes and drives continues to dramatically increase, choose the containers that meet or exceed these critical certifications.

XPRESSPAX KEY IMPACT PROTECTION FEATURES

- Custom-formulated rubberized polymer absorbs energy on impact, even in hot and cold temperatures. IEC certified to resist penetration to Level 4 - 4.
- Integrated molded soft lid-pad adds extra protection
- ISTA-certified to withstand vibration and shock

WATER PROTECTED AND ZERO PARTICULATE DESIGN

- Molded gaskets are integrated right into our container design to uniquely protect your valuable media from water and contaminants
- IEC-certified to resist penetration

SECURITY:

- Integrated and positive lockable latch system on all XpresspaX Containers
- Improved tamper-resistant hinge assembly

Dual-tray Container, holds up to 36 LTO tapes

THE DATA PROTECTION SYSTEM THAT OUTPERFORMS TURTLE IN HEAD TO HEAD TESTING

Single-tray Container, holds up to 18 LTO tapes

XpresspaX's proprietary zero-particulate, impact absorbing LTO without case insert

LTO & HARD DRIVE SPECIFIC STORAGE

According to Fujifilm—the world’s largest tape manufacturer— one of the greatest challenges IT groups face today is the exponentially growing volume of data.

Tape storage is the ideal method for managing today’s data growth challenge in a reliable and cost effective manner. And, with LTFS (Linear Tape File System) making tape faster and easier to use, it has now become the best solution for long term data storage. As IT professionals continue to demand more reliable and cost-

effective data backup and recovery systems, it’s critical that the containers used to transport and store data are built to withstand all potential risks. XpresspaX Containers are designed and tested to meet or exceed the needs of today’s high-volume data storage and transportation industry. XpresspaX has the ONLY container system certified and approved by Fujifilm to protect LTO cartridges. When you need data storage tapes to get there, and back again, you need XpresspaX intelligent media storage products.

As internal and external hard drives become more cost-effective as backup devices, companies are using more than just tape to backup data. The unique XpresspaX interchangeable insert system makes it easy to transition your system from tape type to

tape type, or from tapes to drives, and back again. By using our custom-designed hard drive inserts in our certified container system, you can store virtually any drive type available without having to switch containers.

MasterpaX™

Extremely rugged containers that expand with your business

From laptops to servers to work stations, today's companies need a secure transport and storage system for more than just tapes and hard drives. XpresspaX offers a full line of military-grade containers for storing and transporting your valuable IT assets.

MasterpaX products are designed with security and physical protection in mind, to protect your valuable hardware and data storage media, whether it's being archived or stored as an integral piece of your disaster recovery plan.

MasterpaX containers provide an air-tight, water-tight and tamper-resistant line of products that give you the flexibility and confidence to consolidate all of your IT component storage. The XpresspaX foam insert system allows you to form-fit your components in endless configurations resulting in the most cost-effective, shock-resistant, and space-efficient storage system available.

Standard MasterpaX features include interlocked stacking capability, locking latches and air and water-tight seals. Most containers also have retractable handles and corner wheels.
